

UISO/UIPO Chalk Talk: Jetstream

Mike Lowe – jomlowe@iu.edu
George Turner – turnerg@iu.edu

Research Technologies - High Performance Systems

1-March-2016

funded by the National Science Foundation
Award #ACI-1445604

What is Jetstream?

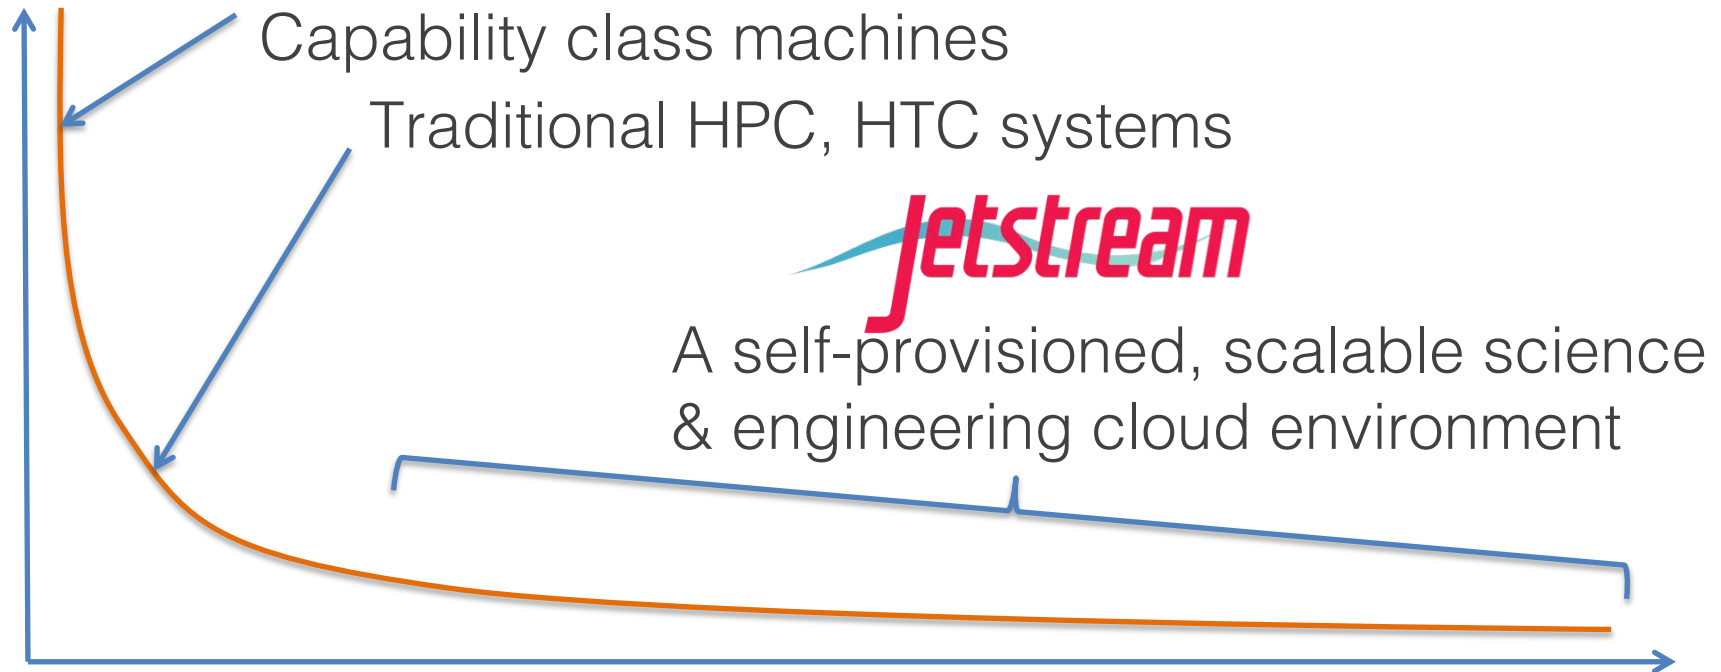

- **User-friendly**, widely accessible cloud environment
- **User-selectable library** of preconfigured virtual machines; no need for system administration skills.
- **NSF's first production cloud** facility supporting all areas of science and engineering within NSF's scope
- **Enable discoveries across disciplines** such as biology, atmospheric science, economics, network science, observational astronomy, and social sciences.

What is Jetstream? (cont)

- Particularly focused on researchers working in the “**long tail**” of science with born digital data

“Long tail” of the NSF XD Ecosystem

Award #1445604

<http://jetstream-cloud.org/>

What is Jetstream? (cont)

- Primary goal is to **expand the userbase** of XD program resources beyond the current community of users.
- **Reproducibility**: store, publish via IU Scholarworks (DOI)
- **Cloudy**: clouds are more the just virtual machines (VM)
 - old way: robust infrastructure, weak software
 - Cloudy way: commodity infrastructure, robust software
 - cows, not pets

What is Jetstream? (cont)

- Software layers
 - **Atmosphere** web interface
 - library of images, generic, domain specific
 - simplify VM administration
 - **Openstack**: software tools for building and managing cloud computing platforms for public and private clouds.
 - **KVM** hypervisor: what the VMs run on\
 - **Ceph**: storage platform that stores data on a single distributed computer cluster, and provides interfaces for **object-**, **block-** and *file-level* storage.
 - Operating systems: CentOS, Ubuntu, Windows?

Who will use Jetstream

- **Researchers & students** needing access to **interactive computing** and data analysis resources on demand. *“A few processors now instead of thousands next week.”*
- Researchers & **software developers** creating & maintaining ***domain specific software packages***
- As a backend supporting **science gateways**

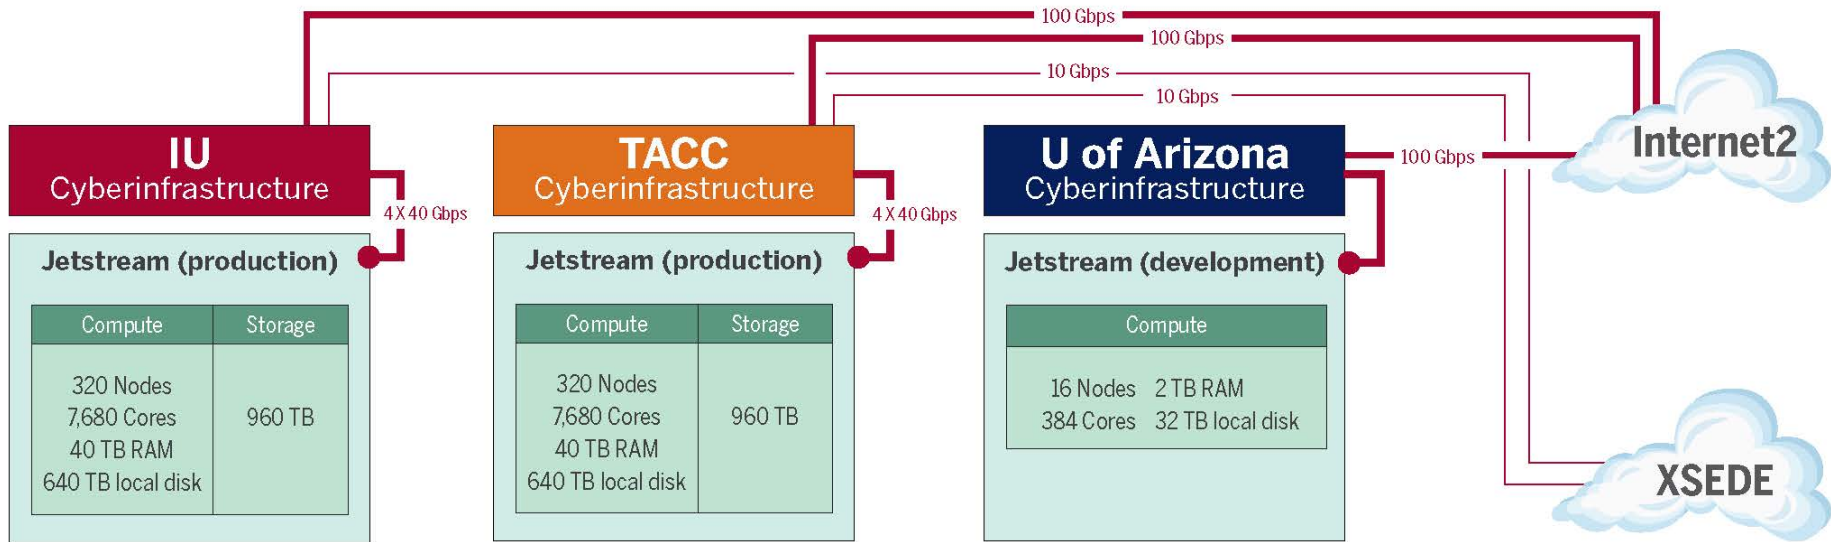

21st century workforce development

- Jetstream will include **virtual Linux desktops** and applications specifically aimed to enable research and research education at small colleges and universities including **HBCUs** (Historically Black Colleges and Universities), **MSIs** (Minority Serving Institutions), Tribal colleges, and higher-Ed institutions in **EPSCoR** States

Jetstream System Overview

VM Instance Sizes (Flavors)

Instance Type	vCPUs	RAM	Storage	Instances/Node
Tiny	1	2	20	46
Small	2	4	40	23
Medium	6	16	130	7
Large	10	30	230	4
X-Large	22	60	460	2
XX-Large	44	120	920	1

Node config: dual Intel E-2680v3 “Haswell”, 24 physical cores/node @ 2.5 GHz, 128 GB RAM, dual 1 TB local disks.

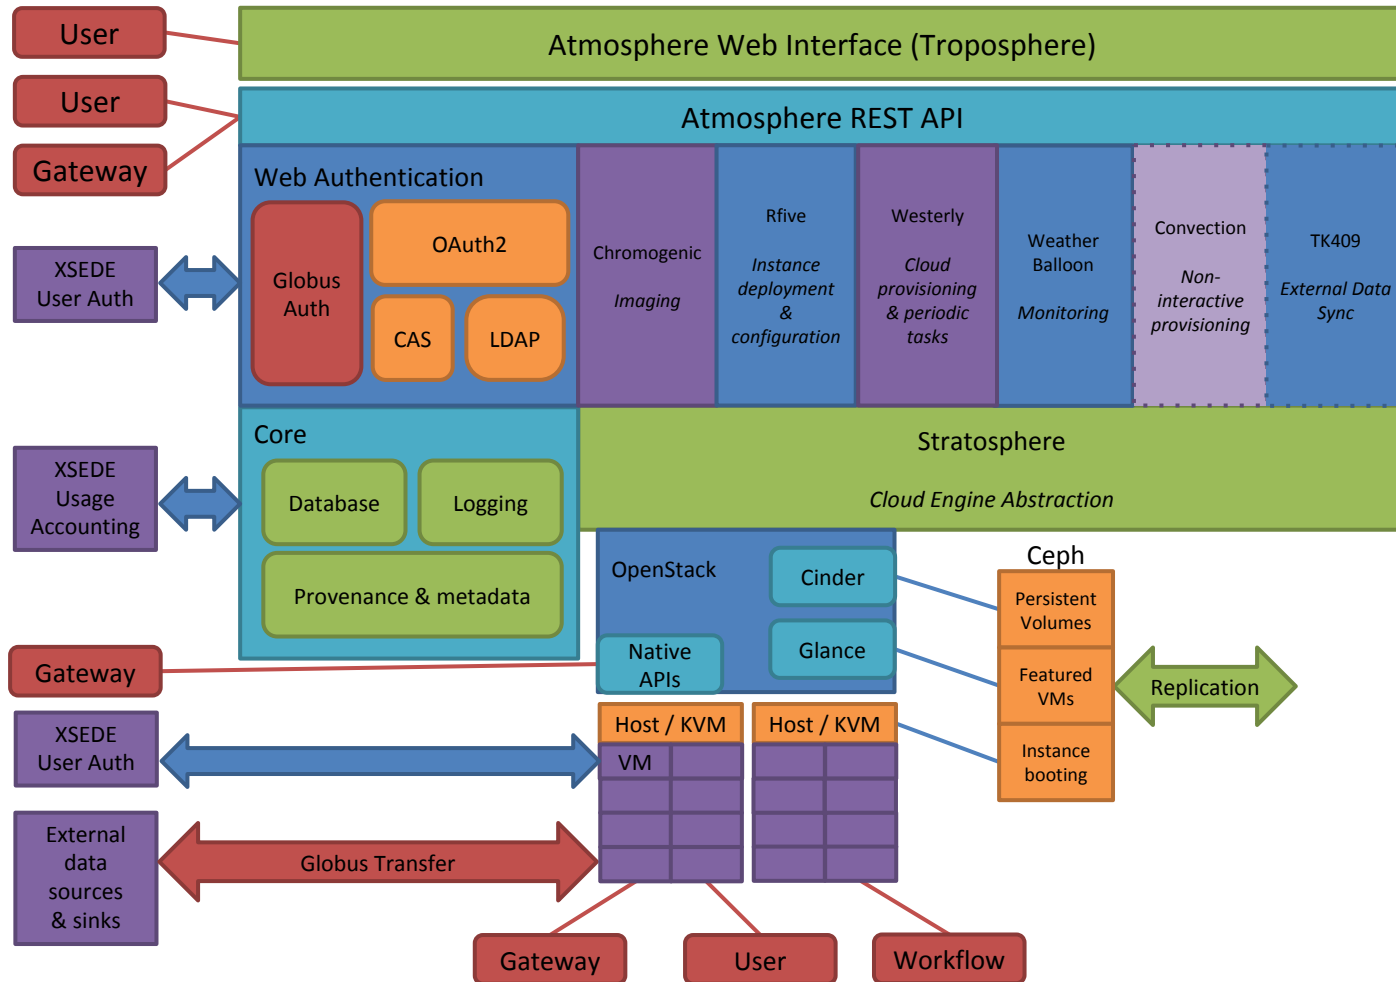

Award #1445604

How do we onboard users onto Jetstream?

- An XSEDE User Portal (XUP) account is required. They are free! Get one at <https://portal.xsede.org>
- Read the Allocations Overview - <https://portal.xsede.org/allocations-overview>
- Write a successful allocation request – start with a Startup or Education request - <https://portal.xsede.org/successful-requests>

Jetstream Information Sources

- Jetstream: <https://use.jetstream-cloud.org/>
- XSEDE User Portal is required to actually login: <https://portal.xsede.org>
- User guide: <http://jetstream-cloud.org/training.php>
- [Paper describing Jetstream Jetstream: A self-provisioned, scalable science and engineering cloud environment](#)
