Jetstream Overview: A national research and education cloud

AGU2018 – December 13, 2018 – Washington, D.C.

Jeremy Fischer – Jeremy@iu.edu - Indiana University

Senior Technical Advisor,

UITS Research Technologies

Fischer, J. (2018). Jetstream Overview: A national research and education cloud. Washington, DC. Retrieved from <https://jetstream-cloud.org/research/publications.php>

NSF Funding Areas in HPC

Traditionally concentrated on enabling petascale capability

- Blue Waters – 13.3 petaflops, 2012 (Frontera awarding in late 2018, coming in 2019)
- Stampede – 9.6 petaflops, 2013 (extended to Stampede2 in 2017 – 18 petaflops)
- Comet – ~2.0 petaflops, 2014

Has funded research into building clouds and computer science

- CloudLab (renewed for 2nd phase)
- Chameleon (renewed for 2nd phase)

Now funding clouds to do research

- Bridges (Hybrid system)
- Jetstream

Expanding NSF XD's reach and impact

Around 350,000 researchers, educators, & learners received NSF support in 2015

- **Less than 2%** completed a computation, data analysis, or visualization task on XD/XSEDE program resources
- Less than 4% had an XSEDE Portal account
- **70%** of researchers surveyed* claimed to be **resource constrained**

Why are the people not using XD/XSEDE systems not using them?

- Perceived **ease of access** and use
- HPC resources – the traditional view of what XSEDE offers - are often **not well-matched** to their needs
- They just don't need *that much* capability

*XSEDE Cloud Survey Report - <http://hdl.handle.net/2142/45766>

“But I really don’t have research needs...I don’t need the national research cyberinfrastructure.”

– multiple researchers at small colleges and universities

What is Jetstream and why does it exist?

- NSF's first production cloud facility
- Focus on ease-of-use, broad accessibility
- User-selectable library of preconfigured virtual machines
- Provides **on-demand** *interactive* computing and analysis or persistent services such as gateways
- Enables *configurable* environments; ***programmable cyberinfrastructure***

Who uses Jetstream?

- The researcher needing a handful of cores (1 to 44/vCPU)
- Software creators and researchers needing to create their own VMs and workflows
- Science gateway creators using Jetstream as either the frontend or processor for scientific jobs
- STEM Educators teaching on a variety of subjects

What Jetstream isn't...

- It's not traditional HPC
- There's no shared filesystem (think cloudy!)
- There's no high-end interconnect fabric (keep thinking cloudy!)
- There aren't GPUs (yet...stay tuned)
- It isn't Amazon, Azure, or GCE (similar, but...)

HPC vs Cloud

Adapting to a different environment:

- No reservations, no queueing – more interactive usage
- Being your own admin – hey, we have root!**
- You really can have almost any (linux) software you want**

** Here there be dragons...

Jetstream and way of the cloud...

- **Cloudy Technologies:** clouds are more than just virtual machines (VM)
 - **Old way:** robust (expensive) infrastructure, weak (cheap) software
 - You expect the hardware to not fail
 - State is maintained in volatile data structures
 - **Cloudy way:** commodity infrastructure, robust software
 - Expect & plan for infrastructure to fail
 - Put intelligence into the software to handle infrastructure failure
- **And my favorite...**

Thinking about VMs...

Cows, not pets: pets take great amount of care, feeding, and you name them; cows you intend to have high turnover and you give them numbers.

-- Mike Lowe (Jetstream architect)

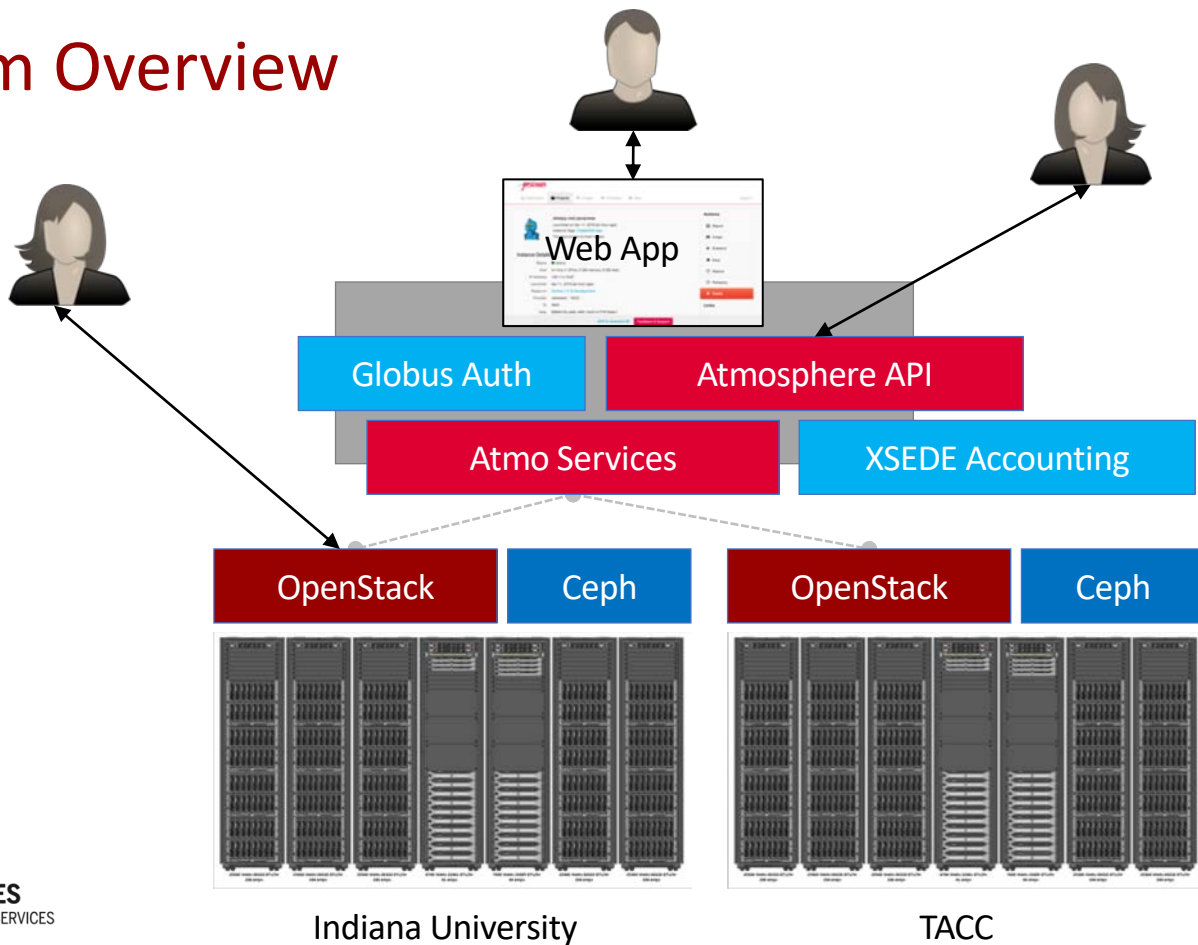

**some caveats for gateways...

Jetstream System Overview

Platform Overview

The Jetstream Atmosphere web interface

The Jetstream Atmosphere web interface

The screenshot shows the Jetstream Atmosphere web interface. At the top, there is a navigation bar with the Jetstream logo, a dashboard icon, and tabs for Dashboard, Projects, Images (selected), and Help. The user's name 'jlfest' is visible in the top right corner. Below the navigation bar, there is a search bar and several user-specific tabs: SEARCH, FAVORITES (0), MY IMAGES (0), MY IMAGE REQUESTS, and TAGS.

Jetstream for engineering researchers (and others)

- Matlab and SimuLink and additional toolkits are installed on Jetstream
- You do NOT need to have a local license to use MATLAB on Jetstream
- If you are a researcher, and MATLAB or SimuLink... you're ready to go!
- If you are an engineering researcher, and you need other tools... let us know!

Not just the usual suspects...

Physics, chemistry, and other “usual” HPC suspects are represented, but Jetstream also is home to projects on:

- Financial analysis / Economics
- Political science
- Humanities / Text analysis
- Network analysis
- Computer Science / Machine learning
- Satellite data analysis

Jetstream for Education

Jetstream has been used in multiple graduate and undergraduate courses

- Management, Access, and Use of Big and Complex Data
- Multiple informatics and general bioinformatics courses
- Business Intelligence (big data and analysis)
- Research Topics in Music
- Multiple genetics and sequencing courses
- Multiple information security and assurance courses

Research Data Alliance workshops, Galaxy workshops, data analysis in finance using R, security and intrusion detection, and principles in cloud computing...

Another Use Case: Galaxy riding Jetstream

Galaxy, a platform for biomedical research, focused on accessibility, transparency and reproducibility

- usegalaxy.org has more than 100,000 registered users executing 300,000+ jobs each month
- Many users need more capacity than the public quota, or other customizations

Use Jetstream as a bursting platform

- From Galaxy Main, send jobs to a Slurm cluster running on Jetstream
- Run Galaxy Interactive Environments (Jupyter/RStudio containers) via a Swarm cluster running on Jetstream

Use Jetstream as a self-service platform

- Pre-built Galaxy image configured with hundreds of tools and access to TBs of genomic reference data, available via the self-launch model within minutes
- Allows users to acquire (free) resources, and gives them complete control

Jetstream Gateway Highlights

- Unidata

Providing distribution and analysis of meteorological data

- OpenMRS

Providing medical records systems for the resource-constrained

- Earthcube

Multiple Earthcube projects for earth sciences

- SEAGrid

Computational chemistry, molecular and fluid dynamics, and structural mechanics gateway

- NAMDRunner

Based on the GenApp gateway

- ChemCompute Gateway

Providing a computational chemistry gateway for educational use

Coming gateways: The Neuroscience Gateway, UltraScan III, and others

Jetstream usage highlights – 1 December 2018

- 413 active XSEDE projects covering 76 fields of science and over 2500 **active users** representing **193 institutions**
- **80%** of Jetstream users have **not used any other XSEDE system**
- >153M CPU hours allocated to XSEDE projects since June 2016
- 15 active science gateways
- 48 education/teaching allocations serving over 904 students
- 1358 (avg concurrent) active VMs in previous qtr, 955 in PY2 to date
- **Highest** user satisfaction in most recent XSEDE survey

Jetstream Timeline...what comes next?

- Completed our second year of operations with extension to November 2020
- Soliciting Research allocation requests plus Startup and Education allocations – including Science Gateways!
- Adding services as deemed useful/mature (Heat, Magnum, Trove, Manila, etc)
- Atmosphere enhancements on a regular cycle
- Working on partnerships with groups like HubZero and others to extend the value of Jetstream

Requesting access to Jetstream

- Trial allocations available **TODAY**
 - <http://wiki.jetstream-cloud.org/Jetstream+Trial+Access+Allocation>
- You can request **startup** allocations **anytime**. (Startups are simple!)
- <http://wiki.jetstream-cloud.org/Jetstream+Allocations>
- You can request allocations for **educational** use **anytime**.
- Next submission period for large allocations is 15 Dec 2018 – 15 Jan 2019
- Research allocation: Project desc (≤ 10 pages) and Scaling doc (≤ 5 pages)
 - **We can help!**

Expanding the reach: Jetstream REU Program

NSF Supplement for undergraduates

- 4 students participated in 2017
- 6 students participated in 2018
- **Planning for 6 in 2019**
- REU student videos on YouTube
<https://www.youtube.com/user/IUPTI>
