Jetstream Overview

A national research and education cloud

David Y. Hancock – Indiana University

Director for Advanced Cyberinfrastructure

Jetstream Primary Investigator

Affiliated with IU Pervasive Technology Institute

April 18, 2019 – SP Forum

What is “the” Jetstream?

- Fast moving air currents
- Hot/Cold air boundaries
- An NSF-funded cloud environment

NASA's Suomi NPP satellite collected this natural-color image using the VIIRS (Visible Infrared Imaging Radiometer Suite) instrument on Sept. 4, 2017. Actively burning areas are outlined in red. NASA image courtesy Jeff Schmaltz LANCE/EOSDIS MODIS Rapid Response Team, GSFC

What is Jetstream and why does it exist?

- NSF's first production cloud facility
- Focus on ease-of-use, broad accessibility
- User-selectable library of preconfigured virtual machines
- Provides **on-demand interactive** computing and analysis or persistent services such as gateways
- Enables *configurable* environments; ***programmable cyberinfrastructure***

Expanding NSF XD's reach and impact

Around 350,000 researchers, educators, & learners received NSF support in 2015

- **Less than 2%** completed a computation, data analysis, or visualization task on XD/XSEDE program resources
- Less than 4% had an XSEDE Portal account
- **70%** of researchers surveyed* claimed to be **resource constrained**

Why are the people not using XD/XSEDE systems not using them?

- Perceived **ease of access** and use
- HPC resources – the traditional view of what XSEDE offers - are often **not well-matched** to their needs
- They just don't need *that much* capability

*XSEDE Cloud Survey Report - <http://hdl.handle.net/2142/45766>

**“But I really don’t have
research needs... I don’t
need the national research
cyberinfrastructure.”**

– multiple researchers at small colleges and universities

When you have to drive to work - but R has also only completed 10hrs of 24hrs worth of simulations. Can I go in the T2 lane with this thing? 😂 #rstats #sydneytraffic

Who uses Jetstream?

- The researcher needing a handful of cores (1 to 44/vCPU)
- Software creators and researchers needing to create their own VMs and workflows
- Science gateway creators using Jetstream as either the frontend or processor for scientific jobs
- STEM Educators teaching on a variety of subjects

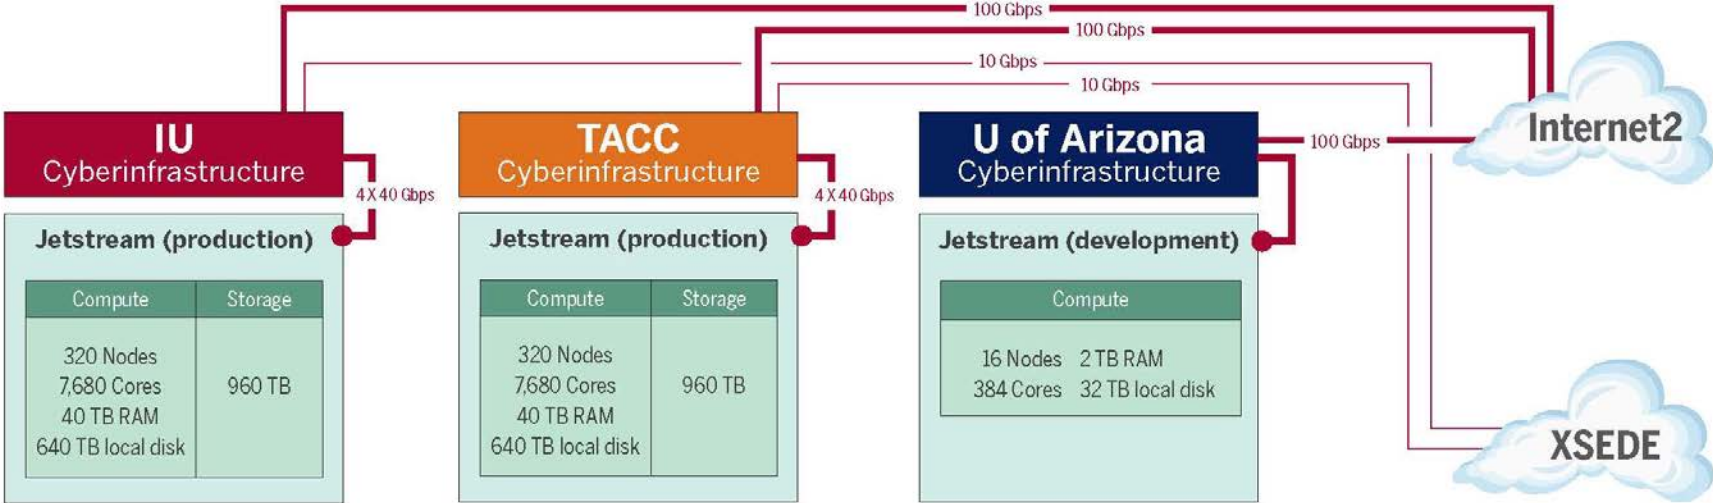

What Jetstream isn't...

- It's not traditional HPC
- There's no shared filesystem (think cloudy!)
- There's no high-end interconnect fabric (keep thinking cloudy!)
- There aren't GPUs (yet...stay tuned)
- It isn't Amazon, Azure, or GCE (similar, but...)

Jetstream Atmosphere web interface

Jetstream Atmosphere web interface

The screenshot displays the Jetstream Atmosphere web interface. At the top, there is a navigation bar with the Jetstream logo and links for Dashboard, Projects, Images, and Help. Below this is a secondary navigation bar with Search, Favorites (0), My Images (0), My Image Requests, and Tags. The main content area is titled "Image Search" and includes a search input field with the placeholder text "Search across image name, tag or description". Below the search field, it indicates "Showing 57 of 57 images".

The "Featured Images" section lists several images with their details and tags:

Jetstream for engineering researchers (and others)

- Matlab and SimuLink and additional toolkits are installed on Jetstream
- You do NOT need to have a local license to use MATLAB on Jetstream
- If you are a researcher, and MATLAB or SimuLink... you're ready to go!
- If you are an engineering researcher, and you need other tools... let us know!

Jetstream for Education

Jetstream has been used in multiple graduate and undergraduate courses

- Management, Access, and Use of Big and Complex Data
- Multiple informatics and general bioinformatics courses
- Business Intelligence (big data and analysis)
- Research Topics in Music
- Multiple genetics and sequencing courses
- Multiple information security and assurance courses

Research Data Alliance workshops, Galaxy workshops, data analysis in finance using R, security and intrusion detection, and principles in cloud computing...

Another Use Case: Galaxy riding Jetstream

Galaxy, a platform for biomedical research, focused on accessibility, transparency and reproducibility

- usegalaxy.org has more than 100,000 registered users executing 300,000+ jobs each month
- Many users need more capacity than the public quota, or other customizations

Use Jetstream as a bursting platform

- From Galaxy Main, send jobs to a Slurm cluster running on Jetstream
- Run Galaxy Interactive Environments (Jupyter/RStudio containers) via a Swarm cluster running on Jetstream

Use Jetstream as a self-service platform

- Pre-built Galaxy image configured with hundreds of tools and access to TBs of genomic reference data, available via the self-launch model within minutes
- Allows users to acquire (free) resources, and gives them complete control

Jetstream Gateway Highlights

- IRIS

Serving large scale earthquake and geographical data for analysis

- Unidata

Providing distribution and analysis of meteorological data

- OpenMRS

Providing medical records systems for the resource-constrained

- SEAGrid

Computational chemistry, molecular and fluid dynamics, and structural mechanics gateway

- NAMDRunner

Based on the GenApp gateway

- ChemCompute Gateway

Providing a computational chemistry gateway for educational use

Coming gateways: The Neuroscience Gateway, UltraScan III, and others

Jetstream usage highlights – 1 March 2019

- 415 active XSEDE projects covering 71 fields of science and over 2250 **active users** representing **205 institutions**
- **80%** of Jetstream users have **not used any other XSEDE system**
- >193M CPU hours allocated to XSEDE projects since June 2016
- 19 active science gateways
- 52 education/teaching allocations serving over 975 students
- 1288 mean active VMs in previous qtr, 1530 peak active VM count
- **Highest** user satisfaction in most recent XSEDE survey

Jetstream Timeline...what comes next?

- Completed our second year of operations with extension to November 2020
- Soliciting Research allocation requests plus Startup and Education allocations – including Science Gateways!
- Adding services as deemed useful/mature (Heat, Magnum, Trove, Manila, etc)
- Atmosphere enhancements on a regular cycle
- Working on partnerships with groups like HubZero and others to extend the value of Jetstream

Requesting access to Jetstream

- Trial allocations available **TODAY**
 - <http://wiki.jetstream-cloud.org/Jetstream+Trial+Access+Allocation>
- You can request **startup** allocations **anytime**. (Startups are simple!)
- <http://wiki.jetstream-cloud.org/Jetstream+Allocations>
- You can request allocations for **educational** use **anytime**.
- Next submission period for large allocations is 15 Mar 2019 – 15 Apr 2019
- Research allocation: Project desc (≤ 10 pages) and Scaling doc (≤ 5 pages)
 - **We can help!**

Expanding the reach: Jetstream REU Program

NSF Supplement for undergraduates

- 4 students participated in 2017
- 6 students participated in 2018
- **Hosting 6 students in 2019**
- REU student videos on YouTube
<https://www.youtube.com/user/IUPTI>
