# Jetstream2: Accelerating cloud computing via Jetstream

**David Y. Hancock – Indiana University**

Director for Advanced Cyberinfrastructure

Jetstream2 Primary Investigator

Deployment of an On-Premise Cloud in a Global Pandemic

HPC•AI Advisory Council – 5 April 2023

# What is “the” Jetstream(2)?

- A US National Science Foundation production cloud environment
- Ease-of-use focus, rapid on-ramp to XSEDE/ACCESS
- **On-demand** interactive computing and persistent services for science gateways
- Enables configurable environments; **programmable cyberinfrastructure**

By Maria Morris: JS2 rear doors (lower) Banksy adaptation [non-commercial] (right)

Now with GPUs,  
large-memory,  
more faster PB!

*Jetstream2*

# NSF Vision and Blueprint

U.S. National Science Foundation (NSF) envisions an **agile, integrated, robust, trustworthy and sustainable CI ecosystem that drives new thinking and transformative discoveries in all areas of S&E research and education.**

- View CI more holistically...
- Recognize and support the translational research continuum...
- Develop a strategy that balances innovations with stability and continuity...
- Work closely with the diverse S&E communities to tightly couple discovery and innovation...
- Achieve new levels of usability by easing the pathways for discovering, accessing, understanding, and utilizing powerful CI capabilities...

From: OAC Vision & Blueprint: Overview and Computational Ecosystem (Apr 2019)

# First – Jetstream, a review

- Jetstream began in 2014, production in 2016, retired 2022
- Simultaneous pilot & production
- Services to 18,714 researchers and educators (8,836 students) on 1,220 projects in 69 fields of science for individuals at 399 institutions
- Provided 7x the educational service units as any other XSEDE resource.
- The 63 science gateways that utilized Jetstream indirectly supported over 183,197 people.
- Six year of operations an overall availability of 98.54%, incl. planned and unplanned outages
- An uptime of 99.9967% where the system was operating but at a reduced capacity

*Jetstream kick-started the EHT's cloud computing effort*

# JS2 – Award & Acceptance Timeline

# Early Operations Projects & Activity

- First PI invitations and projects added in February 2022
- Project migrations in May – July 2022
- Q1 2023: 333 projects and 1,882 individuals (499 students)
- >900 unique people have created JS2 instances to date
- Includes multiple science gateways and education/training allocations
- Full production in September 2022 after NSF approval
- Retired Jetstream[1] in July/August 2022

"Bike Exchange - 2009 IU Women's Little 500" by  
Indiana Public Media

## What worked in JS1?

- Allowing API access and full control (root privileges)
- “Indefinite workflows” – allowing instances to run continuously – providing PIs renew their allocations
- Development of trial allocations

Flickr user MattHurst – Broken Blackberry

## What didn't work?

- Forcing small allocations into the research allocation process
- Lack of multi-year allocations
- Lack of shared data set storage
- Multiple user Domains

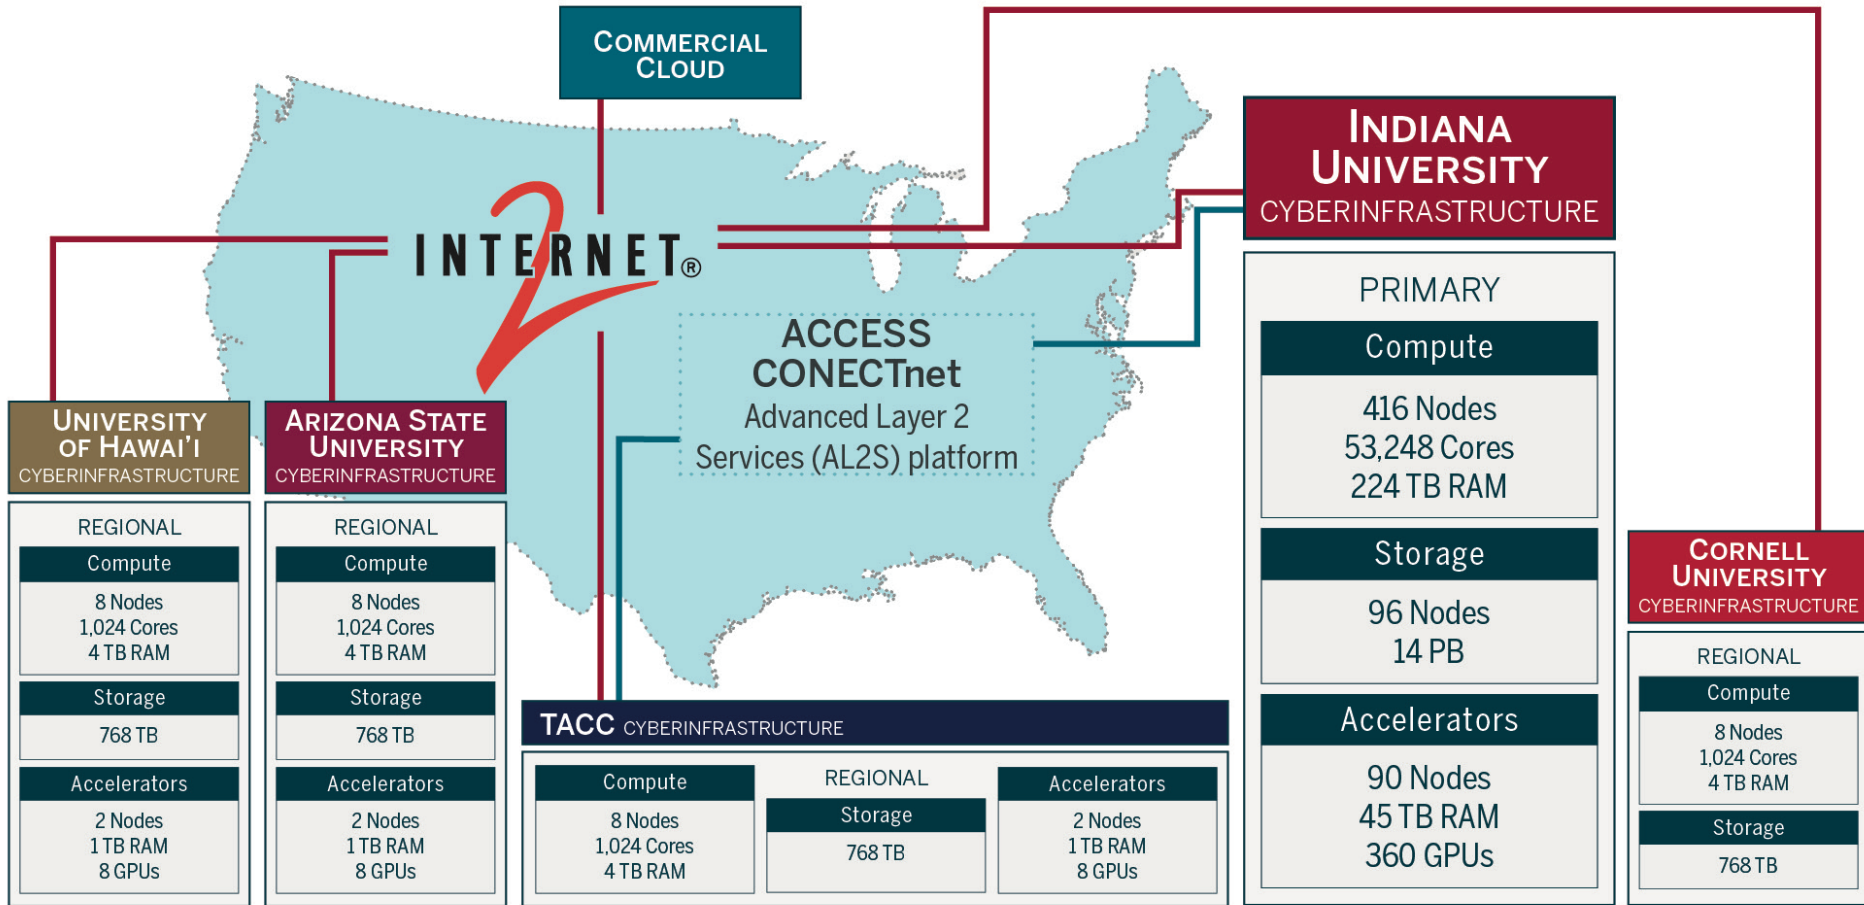

# JS1 Lessons learned

## Challenges -> Inspired changes

- Storage capacity -> Larger HDD pool and new flash storage
- Homogeneous hardware -> Inclusion of NVIDIA GPUs (via vGPUs) and memory diversity
- Separate OpenStack domains -> Unification of “Atmosphere” domain
- Virtual networking architecture/maintenance -> Increase offload capabilities via Cumulus Networks software and Mellanox hardware (NAT & simulation)
- Acceptance & integration into national CI ecosystem -> Changes to our metrics/KPIs & accounting processes
- Deployment diversity -> Leverage single technology for config management

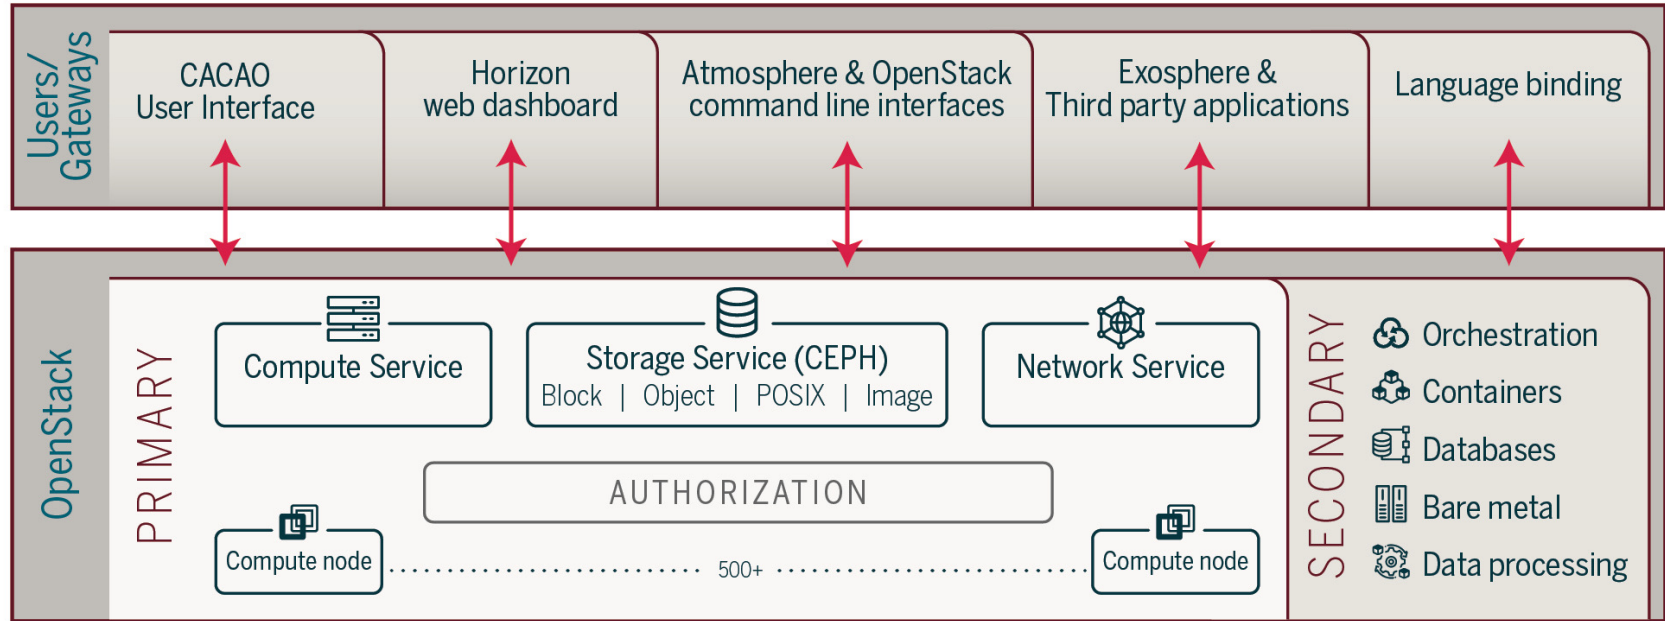

D.Y. Hancock – Castello di Nipozzano 2017

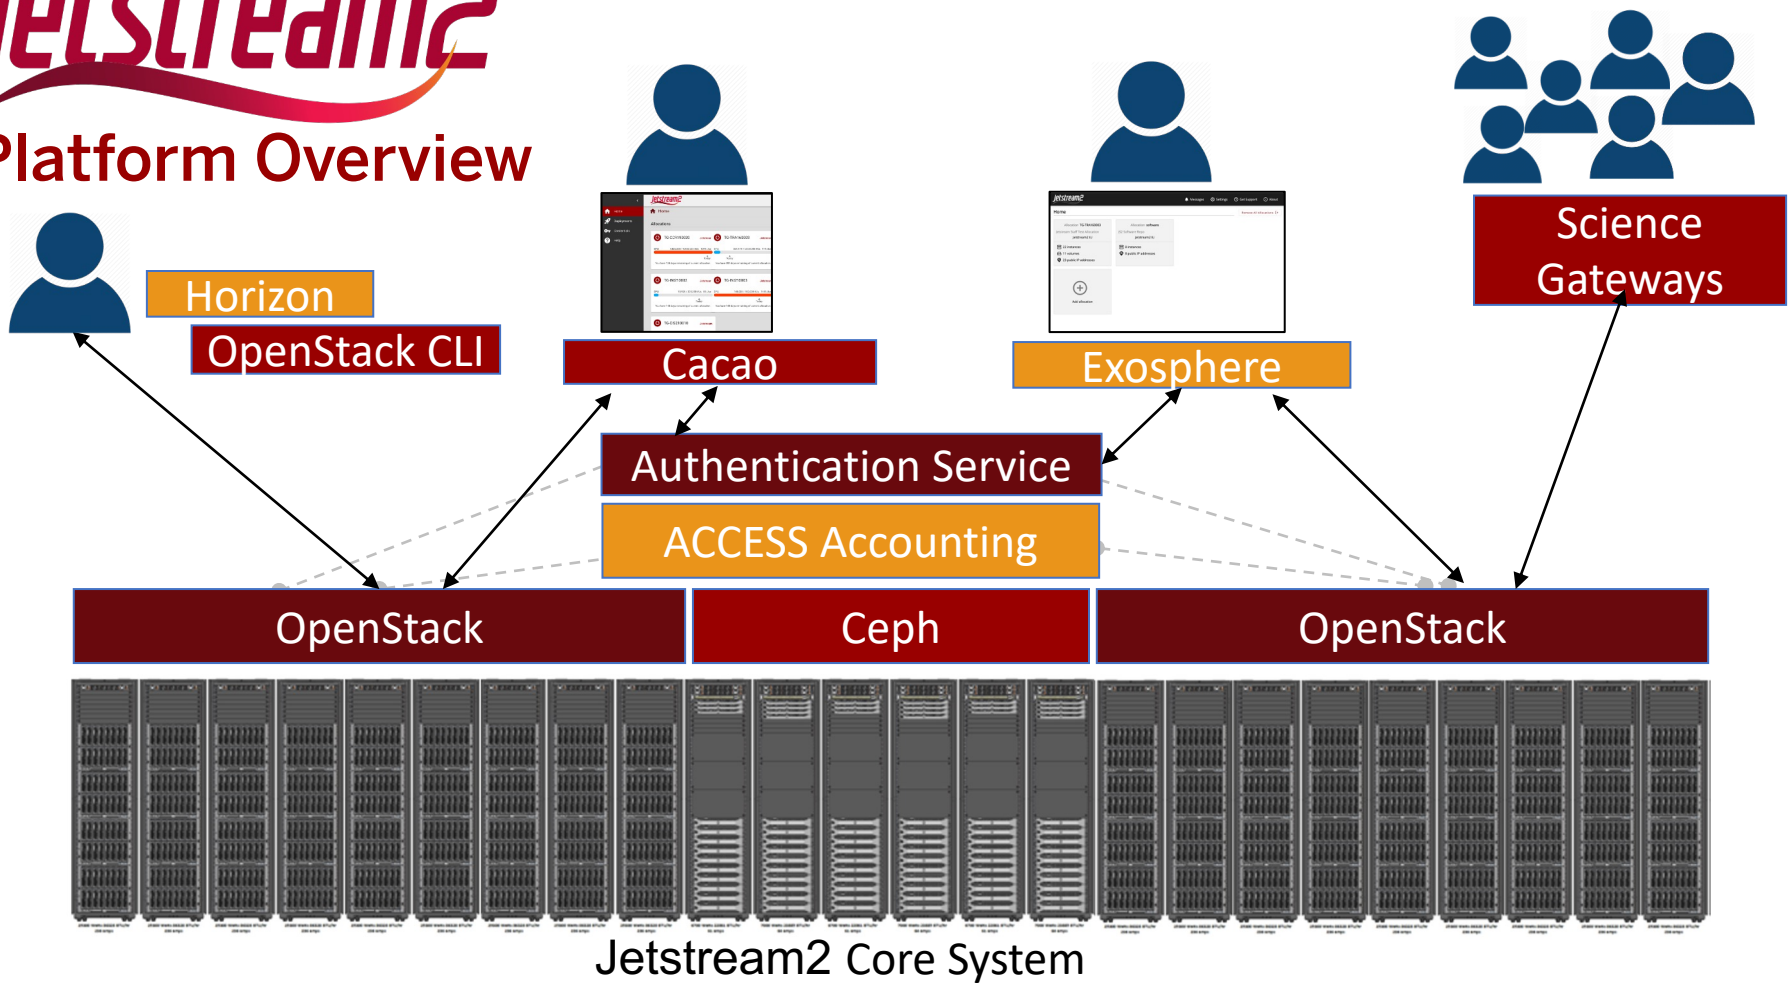

# Conceptual Jetstream2 Architecture

# Jetstream2

## Platform Overview

# Production & Pilot

Vision for Jetstream2 is that it functions as a **production** system yet does not cede our **pilot** roots.

- Obsolescence vs Maturity & graceful aging
- Carry new lessons into the future

*Imitation is the sincerest form of flattery*

- Influenced design of many other systems
- Distinct utility, focus, and inclusion
- Reflecting on Why?

"Metamorphosis" by h.koppdelaney  
Flickr CC BY-ND 2.0

# Pandemic Challenges & Lessons

Be early & adaptive

- Changed major items to lessen delays
- Water cooling, CPU configs, order and deployment, benchmarking, integration

Prioritize people

- Cyberinfrastructure<sup>1</sup> includes people
- Highly distributed teams (NY-NZ)

Be patient, have grace

- Capacity to accept or tolerate delay, trouble, or suffering without getting angry or upset
- You control your reaction, not the situation

D.Y. Hancock – Tijuana, MX

# Jetstream2 Capabilities

Enhancing IaaS model of Jetstream:

- Improved orchestration support
- Elastic virtual clusters
- Federated JupyterHubs
- Ease storage sharing (CephFS w/Manila)

Commitment to >99% uptime

- Critical for science gateway hosting
- Hybrid-cloud support

Revamped User Interface

- Unified instance management
- Multi-instance launch

Feb 12, 2019 – Jet stream region called “Jet N6”  
NASA/JPL-Caltech/SwRI/MSSS/Kevin M. Gill

- >57K cores of next-gen AMD EPYC processors
- >360 NVIDIA A100 GPUs will provide vGPUs via NVIDIA’s MIG feature
- >17PB of storage (NVMe and disk hybrid)
- 100GbE Mellanox network

**New Deployment** JETSTREAM 2 / BIO220047

Select a template that best describes what you want to do:

- simple launch of one or more vms**  
openstack-single-image
- launch a multi-vm zero-to-jupyterhub  
jupyterhub
- launch a multi-vm kubernetes cluster (k3s)  
single-image-k3s
- launch instances for a workshop  
vm4workshop

[GO](#)

# Operations highlights

- OpenStack upgrades Wallaby -> Zed
  - Shared storage availability (Manila)
  - Using CI/CD for image build pipeline
    - Weekly updates (vs periodic)
    - Allows more distros (currently 7)
    - Allows reuse of our pipeline for others
- <https://gitlab.com/jetstream-cloud/>
- Launched a "software store" using CephFS and LMOD

## THE HIGHLIGHTS

UNA BANDA TRIBUTO A BOB DYLAN

**DON'T BOO ME TOUR 2006**

**AGORA CAFE**

# Dynamic Connections

Importance of leveraging other projects

- XSEDE -> ACCESS
- Exosphere
- CyVerse – CACAO
- Globus
- Custos / CI Logon
- Open Source (KVM, Ceph, Salt ...)

Monterey Bay Aquarium – D. Y. Hancock

instance with NVIDIA A100 vGPUs

# What's next?

- Nearing end of YR 1 operations
- Prepare for panel review (April 2023)
- Integrate new partners
- Survey JS2 community
- Grow the community, focus on new tools and approaches
- Support hybrid science gateways
- Upgrade, share, and evolve
